- Istanbul / Turkey
- <https://github.com/settings/profile>

PROFESSIONAL OVERVIEW

Full Stack Developer skilled in **React, Next.js, TypeScript**, and **Node.js (Express, MongoDB)**. Focused on building **scalable, user-centric web apps** with **Tailwind CSS** and clean UI/UX.

Languages: English, Somali (fluent), Arabic (intermediate).

WORK EXPERIENCE

Frontend Engineer

Weblayer, Istanbul | 2024 -2025

- Developed and optimized dynamic web applications using React, Next.js, and TypeScript
- Ensured application performance, cross-browser compatibility, and SEO best practices
- Translated Figma designs into responsive, pixel-perfect UIs with **Tailwind CSS** and modern front-end patterns
- Improved **application speed, accessibility**, and **cross-browser compatibility**, enhancing user experience

Junior Full stack Developer

Asalsolutions, Mogadishu Somalia | 2023- 2024

- Developed and maintained the front- and back-end of the NIRA portal (React/Next.js + Node.js/Express + MongoDB) to support the digital identity management ecosystem for Somalia
- Implemented key modules including the “Registration” flow, “Certificate Delivery System”, “Hubiye Verification Platform”.
- Built responsive, accessible UIs (with Tailwind CSS) to ensure users from diverse regions and devices can interact seamlessly with the service.
- Integrated REST and real-time APIs with secure authentication (OTP, biometric links) to support identity verification, certificate issuance and status tracking.
- Optimised application performance, cross-browser compatibility and SEO for government-level visibility and usability.
- Ensured data integrity, scalability and security in collaboration with the backend and DevOps teams, following best practices for a national-scale digital identity system.
-
