SUMMARY

Frontend Engineer skilled in **React, TypeScript, and Next.js,** Passionate about building **user-focused, high-performance** web applications with clean, scalable code and great UI/UX.

EXPERIENCE

WEBLAYER

Jan 2025 – Present | On-Site

At Weblayer, I build and optimize web applications using React, TypeScript, and Next.js, ensuring a smooth and high-performance user experience. I work closely with designers and backend developers to create intuitive and accessible interfaces.

PROJECTS

- **E-commerce website**

  an e-commerce website for Weblayer, using **Next.js, Tailwind CSS, and TypeScript** to enhance user experience and performance.
  Collaborated with designers and backend developers to create a seamless and visually appealing interface.
  Focused on writing clean, maintainable code while implementing best practices for scalability and performance.

- **DALAB**

  Developed **Dalab** an e-commerce website that have customer side and Addmin side , using **NEXT.JS** and **Tailwind CSS** for the frontend and **SUPABASE** for the backend. Focused on creating a seamless shopping experience a modern , responsive design and efficient data management
